

Update of Reference Manager Overview Chart

In March 2009 I posted an overview chart of how popular reference managers have implemented some important features. I've since updated this chart several times, and the chart probably has outgrown the format of a blog post. For that reason I now made the chart available

- on a dedicated page with an easy to remember URL (<http://bit.ly/refman>),
- as PDF file for downloading and printing,
- under a Creative Commons Attribution license (like all content here on PLoS Blogs) for redistribution and reuse.
